SOFT SKILLS

- Discipline
- Critical thinking
- Active listening and empathy
- Priority management
- Goal-setting
- Commitment to quality
- Adaptability
- Attention to detail
- Self-awareness and openness to learning

PROFESSIONAL EXPERIENCE

Computer Systems Analyst
Full Stack Web Developer

Freelance | March - December 2024

Designed, developed, and implemented a web application for the comprehensive management of a custom furniture company's information. Responsabilities included:

- Functional requirements analysis and system design.
- Full-stack web development using TypeScript, Node.js, Express, Sequelize, RESTful APIs, JWT, React.js, React Bootstrap, MySQL, and AWS S3.
- System deployment on a VPS with Ubuntu Server and Cloudflare configuration for performance and monitoring.
- User training and technical support.

Full Stack Web Developer

Municipality of San Vicente | September - December 2023

Developed the **Registro Informático Deportivo (RID)**, a web application for managing the municipality's sports information. Development tools included Node.js, Express, Sequelize, React.js, React Bootstrap, and MySQL.

Teaching Assistant

Argentina Programa 4.0 | September - October 2023

Assisted in the **Junior Programmer in Machine Learning** training program offered by UNaM. Developed a practical case using neural networks to detect brain tumors in MRIs using open datasets.
